

Coverage gap analysis for Gujarat Police

Generated 09 Sep 2026 02:10 IST · IST date 2026-09-09 · Sandbox catalogue (~30 official cameras), not the statewide ~80,000 target.

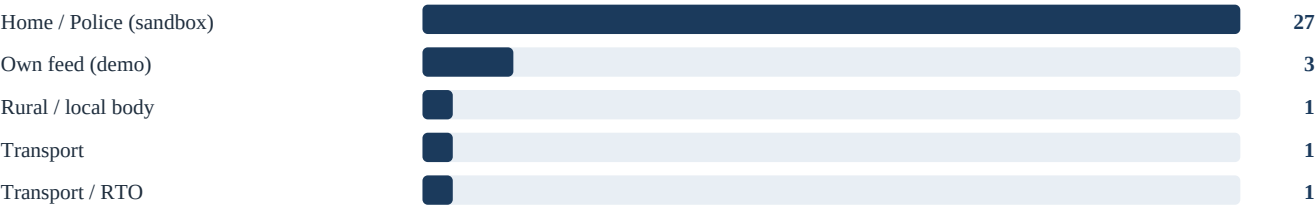

Unlocated pins use a Gujarat centroid until official coordinates exist. Silent cameras have no Detect events yet. No-ANPR cameras have vehicles but no readable plate. Sandbox publishes ~30 official cameras; statewide target is ~80,000.

Cameras by city

Cameras by department

Silent cameras — registered, no Detect events yet

Camera	Id	City
01 Chiman bhai Bridge	sentinel-1	Ahmedabad
02 Janpath	sentinel-2	Ahmedabad

5 unique plates in the index.

What this report is — and is not

This sheet is a **coverage and metadata** view for Control Room / GIS staff: which cameras are on the map, which are silent, which lack coordinates, and which plates the ANPR index has seen. It is **not** a 24-hour video archive. Keep the daily CSV logs. Keep a short window of annotated JPEGs. Departmental NVRs remain the video store. Statewide scale is a GIS + metadata problem first; the sandbox only publishes about 30 official cameras.

Map legend in the live UI: green = online, red = offline, gold = unlocated, blue = silent (no Detect yet).
